

Sangfor Technologies is the leading and the most innovative vendor of network solutions in Asia. It is specialized in Virtualization, Network Security & Optimization with products including but not limited to: Virtual Desktop, Next Generation Firewall, Web Application Firewall, Internet Access Management, WAN Optimization, SSL & IPSec VPN and so on.

Through constant innovation, Sangfor always strives to create value for our customers by helping them achieve sustainable growth. We take customers' business needs and user experience very seriously, placing them at the heart of our corporate strategy.

Established in 2000, Sangfor now has more than 55 branch offices in China and overseas (US, UK, Hong Kong, Malaysia, Thailand, Indonesia and Singapore). Sangfor currently has 2,300+ employees, with 40% of them dedicated to R&D. Furthermore, each year at least 20% of Sangfor's revenue will be put into R&D to improve current products as well as develop new solutions for our customers.

## **A Glance of Sangfor Product Family**

### **NETWORK SECURITY**

#### **Internet Access Management: Simplify and Virtualize User Management**

##### *Intuitive & Intelligent User Management*

- Identify who is consuming your bandwidth resources
- Check what your employees are doing on the Internet
- Learn how you can manage your network

##### *Simplified Reporting Tools to Know It*

- Your enterprise bandwidth is sufficient
- Your employees are focused on their work

- Non-work related applications are consuming your bandwidth
- Someone has leaked sensitive information

### **NGAF Firewall Platform: Your Security Partner to the Future**

#### *Total Threats Prevention to All Business Networks*

- Network virtualization with comprehensive security and risk assessment reporting tools
- Simplified management with automated network configuration
- High-performance hardware design coupled with Sangfor Regex Engine

#### *The World's Only Professional NGFW + WAF in 1 Box for Infrastructure Security*

- Gartner Magic Quadrant for Enterprise Firewall
- NSS Labs highest "Recommended" rating on WAF
- Certified by ICSA labs
- MAPP partner and CVE compatibility on IPS

## **NETWORK OPTIMIZATION**

### **Your Best Choice of WAN Optimization**

- Intranet Optimization Scenarios: For Microsoft Exchange, Web-based application, file sharing, video conference, ERP, VAA, data storage and synchronization.
- High Network Availability: Link availability detection, multi-line management, leased line/MPLS line fall over, central management control and bandwidth access control.
- Security Features: Easy and secure VPN, IPsec VPN, anti-DOS, ARP protection and ACL.

### **SSL VPN: Rapid, Secured & Simple Solution for Enterprise Remote Users**

- Threat Protection
- Lower Desktop Support Cost

- SSL VPN + IPsec VPN All-in-One
- All-Around Optimization Solution

## **VIRTUALIZATION**

**Hyper-Converged Infrastructure: 5-Tier Architecture Consolidated into 1; 1**

**Single User Interface Managing All IT Resources.**

- Ultra-Simplified Operation
- Reduced TCO & Pay as You Grow
- High Performance
- Best NFV Functions
